## **DETAILED ACTION**

## **DETAILED ACTION**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-42, drawn to a memory device including a dataline driver, classified in class 365, subclass 230.06.
- II. Claims 43-47, drawn to a method of testing, classified in class 365, subclass 201.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions I and II are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
